Color Therapy

With the Earth now coming to a new consciousness of color, there are some changes to the Melchizedek symbols system. The symbols each have a different color and this color itself is written within the manual. However the change is not in the symbols itself but the hologram of the flower of life.

The flower of life as we all know is made of the environmental love energy. So whatever energy is predominant, it will follow suit and evolve. For now, earth is a 6th degree sacred planet. There are 12 degrees of evolution and now earth is considered a middle creation consciousness. The energy that is predominant is the aurora. The energy of the aurora is also where modalities like the Language of Light get its energy. So these modalities that work more on the colors will predominate.

The flower of life is also anchoring this energy, and therefore there is an optional inclusion of color in the Melchizedek Symbols. You may choose or not choose to have a color when you are visualizing the flower of life hologram. The reason why the inclusion of color is optional is because color inclusion act as a booster that helps in the healing and sensing of the energy. Therefore with or without the color the Symbols will still work.

Optional

When you are visualizing the Flower of Life hologram, you now add in a color to the flower of life hologram. These are the color you add for the various issue.

White	→ For connection to Source
Grey	→ For space balancing and clearing
Black	→ For bring more love to the surrounding
Lavender	→ For allowing life experience to become easier
Red	→ For Will power
Blue	→ For more love in a situation
Orange	→ For clearing the thoughts
Green	→ For clearing emotions and feeling
Purple	→ For clearing subconscious
Brown	→ For earthly matters like work and environment

These 10 colors are specifically chosen for the Flower of Life hologram in the course.

However I do encourage all students to use more colors to help in different situation. This color scheme is what I use and I find it effective to help the others with it.

Colors are amazing things that helps us grow, if there is any confusion or you do not want to remember colors, then just add a color you feel is appropriate to the symbol you draw. Then this would also do. Your avatar will help in the changing of color.

The purpose of color in the system is really to tap into the consciousness and energy of the people currently working on this level. Color can also assist in the healing at a more efficient rate. Therefore try to work with the colors and it will prove to be very helpful. The knowledge of color is something I would like to share so that you can tap more closely to the current energy. This is the update that I have added for this coming year.

Namaste

Rev. Khemery / Melchizedek
