Surrendering to Grace

In the world that we worked in today, we often see ourselves in various types of situations. From Comedy to Tragedy, every single event would trigger us to feel, think and process our life events. This simple analyzing and reflecting is how we learn from our life lessons and problems in life.

Most of the times, we try to understand how things happen and from there we find a solution to solving the problem. However sometimes, things just do not work out. This is not because you are not analyzing deep enough or not being sensitive about the environment. Also it is not like what some New Ager might feel “not Christed” to the whole situation. So what is the reason? The answer is not surrendering.

Being Christed is our born divine duty that is definite. We are all here to remember how to be the master and how to be the Christ. Yet the pit fall is that people do not learn anything on earth by grace. Though there might be thousands of writers teaching people how to learn by grace. Grace comes in many different forms and it is the reason why thing goes. There is an “**energy of grace**” that earth has in its energy grid for billions of years and they are really the key to help things moving.

Do you feel sometimes you keep telling yourself how wonderful things would be if you can do this and I want to make things happen in my life. Now the funny thing is that the more you want things to happen, things will not happen. This is because most of the times, we are not working at spirit level yet. We fail to listen to our inner spirit for advice and such. So to do everything on our own will only makes things difficult for you only.

So what is it about grace that is so helpful? Elohim Grace and Star Light, are the Elohim of making things the “right/easy” way on earth. They work on the silver ray which is a feminine ray which helps to bring the intuition out of us. They might not be some of the most popular ascended master people would like to invoke. However, they have been serving for a long time. The way how you can surrender to them is so easy. Just request, “**Grace and Starlight please fix my (Problem).**” There, it is just so simple and easy. It does not even take 10 seconds of your life.

To really testify if your life would change, you have to try this method of surrendering. However, if you have your own way to surrender, please continue

to do it. It will not only help you but your friends. I cannot help but emphasize how important it is to surrender our problems in life. This is also because we are all trying to see life easy and joyful. So why should we make ourselves in a mess? Allow yourself to give in to the higher forces and make things happen!

Grace and Starlight fix my life!

Allow miracles to happen.

Blessings with Love and Light
Rev. Khemery and Grace and starlight
