

The Trinity in your eyes

It came to my notice that there is something about the connection that our eyes have that might trigger certain information expansion. Thus I feel guided to share this information and hopefully someone can share something with me. Ever wonder why we call our third eye the third eye? Does this word third actually ring a bell in you?

For some, this third eye represents many different things. From the state of consciousness to the energy centre of the body, it is like a key in many aspects. Now the third eye energy actually is referring to the energy source which concentrates at the pituitary gland. Now the significant part of it is that where the pituitary gland links to is the pineal gland which is in the middle of the brain. This is where the divine spark connection is.

So when we are using our third eye we are actually connecting these two glands. Now the interesting thing is remember in the bible they talked about “**when two eyes are one**”. The two eyes are the normal eyes we have. Our physical eyes are the physical manifestation of the soul’s vision. The eyes will then capture images which will be sent to the brain.

If the God consciousness is the divine spark in our body, we are the physical son/daughter of God. The process of our inner voices assisting us is the Holy Spirit. So how do all these take place in our eyes? The divine spark is actually where the third eye is and the physical eye balls are the son and the process of image capturing and analysis is of the Holy Spirit.

One main reason why I am telling you this is that we always see things in life with too much duality and there is really a need to stop that. Our eyes are not made this way. The reason the trinity is within the eyes is to help us **See GOD** in everyone. When our physical eyes are with direct linkage with the Divine spark, and see only what the divine spark can see, you are helping yourself clear duality. This is because when you are directly link to GOD, you will not need any process to bring the manifestation down. You can instantly manifest it.

One exercise you can do is to close your eyes, now see your eyes and the third eye forming this triangle. This triangle represents the duality you command in vision. Remind yourself its duality you are seeing now. Now see this triangle slowly merging into an eye - A single eye. You are in one consciousness. You have transcended the duality. You are at Peace. This will help your connection with the inner spark of peace.

Next time, when you are doing meditation, try changing the word “**third eye**” to “**consciousness**”. It also helps you to integrate your God nature character.

With lots of love and light
